	Urgent	Not Urgent
Important	DO 1. Workout logging 2. Progressive overload calculations 3. JSON persistence	Schedule 1. User interface 2. Data visualization 3. Cloud database
Not Important	Delegate 1. JSON 2. data/time handling 3. Unit testing	Delete 1. Social aspects 2. Gym chats 3. Workout suggestions

The Minimum Viable Product for this project will contain features in the "Do" quadrant: core workout logging (tracking sets, weights, and reps), automated progressive overload calculation logic, and local JSON persistence using Gson.
